

# LOUISIANA WITHHOLDING TABLES AND FORMULAS

Effective on or after January 1, 2025

### Quick as a Click

Louisiana Taxpayer Access Point (LaTAP) is the fastest and most accurate way to file and pay your withholding with the Department of Revenue.

Register for LaTAP at [www.revenue.louisiana.gov](http://www.revenue.louisiana.gov).

## COMPUTER FORMULA METHOD

The overall structure of the formulas used to compute the withholding tax is to calculate the tax on the total wage amount and then subtract the amount of tax calculated on the standard deduction that the taxpayer claims for withholding purposes. The correct withholding formula depends upon the standard deduction claimed and annual wages. Any taxpayer may use 1 or 2 as the standard deduction; however, those taxpayers claiming "2" on Form R-1300 (L-4), *Employee Withholding Certificate*, must use the Married-Joint, Qualifying Surviving Spouse, or Head of Household withholding formulas.

### Formula Variables:

1. W is the withholding tax per pay period.
2. S is the employee's salary per pay period for each bracket, based on the midpoint of salary ranges.
3. N is the number of pay periods.

### Formulas – Based on a 3.09% Withholding Rate:

1. No Standard Deduction  
 $W = S \cdot .0309$
2. Single Individual and Married-Separate  
 $W = (S - (12,500/N)) \cdot .0309$
3. Married-Joint Return, Qualified Surviving Spouse, or Head of Household  
 $W = (S - (25,000/N)) \cdot .0309$

### Example 1:

Taxpayer is claiming "1" in block A of Form L-4. Taxpayer is paid \$700 weekly (52 pay periods, \$36,400 annual salary).

The formula to use in this example is:

$$W = (S - (12,500/N)) \cdot .0309$$

The calculation for this example:

$$S = 700$$

$$N = 52$$

Remember, if any of the variables in the formula are negative, the negative variable should be considered zero.

$$\begin{aligned} W &= 700 - (12,500/52) \cdot .0309 \\ &= (700 - 240.38) \cdot .0309 \\ &= 459.62 \cdot .0309 \\ &= 14.20 \end{aligned}$$

### Number of Pay Periods in a year:

Daily payroll	365
Weekly payroll	52
Bi-weekly payroll	26
Semi-monthly payroll	24
Monthly payroll	12
Annual payroll	1

### Example 2:

Taxpayer is claiming "2" in block A of Form L-4. Taxpayer is paid \$4,600 bi-weekly (26 pay periods, \$119,600 annual salary).

The formula to use in this example is:

$$W = (S - (25,000/N)) \cdot .0309$$

The calculation for this example:

$$S = 4,600$$

$$N = 26$$

Remember, if any of the variables in the formula are negative, the negative variable should be considered zero.

$$\begin{aligned} W &= 4,600 - (25,000/26) \cdot .0309 \\ &= (4,600 - 961.54) \cdot .0309 \\ &= 3,638.46 \cdot .0309 \\ &= 112.43 \end{aligned}$$

**WAGE BRACKET TABLES AND INSTRUCTIONS**

1. Select the set of tables that corresponds to the payroll period of the employee.
2. With the use of the information obtained from Form R-1300 (L-4), *Employee's Withholding Certificate*, determine which column of the tables to use.
  - If your employee claims no deduction, use Column 0.

- If your employee claims "1" (single or married separate) in block A of Form L-4, use column 1.
- If your employee claims "2" (married filing jointly, qualifying surviving spouse, or head of household) in block A of Form L-4, use column 1.
- Unless otherwise indicated, amounts listed in the tables indicate dollars and cents.
